Experience

Software Engineer Eduka Solutions
August, 2007 – Current

Lead developer on large-scale Flash based diagramming and charting web application to support investment consulting firm, C#.NET desktop application to manage Perth Glory's stadium seating and an important upgrade of flagship CMS product from Classic ASP to ASP.NET/C#. My solutions on all projects simplified workflow and delivered large boosts to productivity of client tasks.

Web Developer Capital IT & Web
July 2006 – August 2007

Sole web developer, responsible for the full life cycle of all client projects. During my time at Capital IT & Web, I functioned as a salesman, project manager, designer, developer and support desk. I quoted and managed websites for a number of small business clients, from landscaping contractors to safety consultants for the oil industry. Provided a high level of customer satisfaction with all aspects of service.

Software Engineer Immortal Dimensions
December 2005 – May 2006

Developed and debugged Flash/Director based application for software startup. Helped maintain and develop the company's website. Implemented new search functionality in flagship product to achieve a higher relevancy of results. Designed and implemented new interface elements. At Immortal Dimensions, I provided valuable help for a company in trouble.

Education

Bachelor of Science, Software Engineering
Edith Cowan University, Perth, Western Australia

Software engineering processes and project analysis with programming language skills, and a selection of electives focused on all aspects of IT security.
